

Email Security Solution

An all-round security service protecting you against phishing attacks and external email threats

Phishing and email fraud attacks are becoming more sophisticated, posing a huge threat to businesses. Email continues to be the primary vehicle used by cybercriminals, with 91% of all cyber-attacks begin with a phishing email according to Deloitte's article. The impact of phishing scams on business's profitability and productivity is immense, securing your email communication has never been more critical for every business operation.

By partnering with Green Rader, DYXnet introduces the next generation cloud-based email security solution that provides the most comprehensive email protection against bulk spams, virus, malware, spoofing emails, phishing, CEO fraud and other email-borne attacks. We navigate your cybersecurity journey and deliver productivity, security, and efficiency to your daily operations!

Embrace Cloud-based Security

Save Upfront Cost

Improve Cybersecurity Readiness

Optimize Operational Efficiency

Key Features :
