DYXnet's solution very well covered our needs."

— Stephen Lam, Managing Director, m-FINANCE Limited

About m-FINANCE

Established in 2002, m-FINANCE is a leading and renowned forex/bullion/commodities trading solutions provider in the region. For years, m-FINANCE has been striving for excellence and committed to providing state-of-the-art trading platforms and innovative one-stop solutions for clients. With our expertise and know-how of the financial market, m-FINANCE has applied cutting-edge technologies in development of a wide range of signature products and services, which include mF4 Trading Platform Solution, White Label Solutions, CRM System, Electronic Identity Verification Solution, MT4 Futures Gateway, MT4/MT5 Bridge and Plugins, ECN System, Automated Trading Solutions, STP Solutions, Cross-platform "Broker+" Solution, Copy Trading Apps, etc.

Headquartered in Hong Kong serving a spectrum of prestigious clientele from Greater China Area and South East Asia, m-FINANCE has long garnered an undisputable reputation in the industry, seizing first-hand opportunities in the fast-growing fintech markets.

Business Challenge

As a fintech solution provider, m-FINANCE built safe, flexible and highly-efficient systems to clients for a "Care-free Trading" experience, anytime, anywhere. m-FINANCE delivers bespoke solutions and systems built on hybrid cloud and physical machines, providing a highly-recoverable system environment via numerous data centre resources.

To maintain a top level of system security and redundancy, an enterprise-grade firewalls and network encryption are essential to guard against hackers and threats through distinctive level of database encryption, networking components and data transmission. At the same time, a stable, reliable and highly-recoverable system environment is just as important to prevent service suspension or job disruption caused by unusual technical situations.

Apart from delivering top-notch products, the highly committed operations team at m-FINANCE plays an equally important role in offering technical support services to clients. On top of closely monitoring system operations, the team has to provide round-the-clock assistance to clients by phone, email and messaging in order to render responsive and efficient service on a timely manner.

Tailor-made Comprehensive Planning

DYXnet has multiple Point-of-Presence (PoP) across the world with an emphasis in Greater China area and Southeast Asia, where m-FINANCE conduct its business. Being a vendor-neutral service provider, DYXnet supports m-FINANCE with the flexibility in allocation of circuit resources regardless of location, hence to be able to get the last mile connection from m-FINANCE's premises or data centre to DYXnet's PoP for their applications to the clients.

To protect trading security and privacy as well as ensuring multiple access of server systems via numerous data centre resources, DYXnet One Cloud Director (OCD) allows m-FINANCE to deploy multi-cloud computing. m-FINANCE also subscribed to AliCloud, which is connected to MPLS same as OCD, hence synchronisation between cloud and cloud resources diversification is achievable with enterprise-grade firewalls and perfect network encryption.

DYXnet's solution advantages – MPLS Network , OCD and Dedicated Internet Access

- **Regional coverage with reliable connection**
Our solutions cover Greater China & major cities in Asia Pacific with multiple classes of services offer, enabling clients to apply separate settings to different types of traffic for better user experience.
- **Stable performance guaranteed**
Our Dedicated Internet Access (DIA) provides 1-to-1 overseas bandwidth provision ration with bandwidths available from 100Mbps to multiple 10Gbps in specific regions so to allow always-on Internet connections
- **Fixed price and unlimited usage**
Compare to public cloud, which adopt pay-as-you-go approach, our ONE Cloud Director, MPLS, and Dedicated Internet Access are capped at a fixed price, regardless data traffic and computing usage.

Why DYXnet?

DYXnet has been a leading network solution provider with numerous of network PoPs in various cities worldwide. We have nationwide and inter-province value-added telecommunications licenses including IP VPN, IDC, ISP, and Cloud Service which ensures the solution of m-FINANCE a stable, reliable and highly recoverable system environment.

Among the first ICT service providers in the region to have obtained ISO certifications including ISO/IEC 27001, ISO/IEC 20000-1, and ISO 9001, DYXnet is also one of the first official members of the China Cross border Data Telecommunications Industry Alliance and one of the first SD WAN service standard drafting units which guarantees their data synchronization and safety between Clouds.

DYXnet's Network Operations Centre also provides 24-hour support with usage report via online portal for real-time traffic monitoring and network performance so to avoid any downtime for our clients.

About DYXnet

DYXnet is one of the leading carrier-neutral enterprise network service providers in Greater China with over 20 years of experience, and is a wholly-owned subsidiary of VNET Group (NASDAQ: VNET), a leading carrier- and cloud-neutral Internet data centre services provider in China.

Right from its establishment in 1999, DYXnet has been specialized in providing premier enterprise network solutions in Greater China. It delivers Multiprotocol Label Switching (MPLS), Software-Defined WAN (SD-WAN), Internet Access, Data Centre Services, and Network Security Solutions to over 1,700 enterprise clients via efficient provisioning capabilities in numerous cities throughout Greater China and the wider Asia-Pacific region. In response to the evolving needs of its ever-growing customer base, DYXnet enlarges its product portfolio to further deliver enterprise cloud and SaaS solutions.

With its outstanding performance in delivering secure, stable, and comprehensive network services, DYXnet is the first batch of ICT service providers in Greater China to obtain several ISO international certifications including ISO/IEC 27001, ISO/IEC 20000-1, and ISO 9001 that reinforce the high standards of its information security, IT service management, and quality management, respectively.
